

Scaling FarMart: Innovations and Future Opportunities

Empowering India's Agri-Community through Technology

Presented By: Kinshuk || Product Manager || Jan 5, 2024

FarMart's Current Offerings

Ingredients Sourcing

Farm-to-business sourcing platform. Tailored solutions (custom milling, white labeling, traceability). Trusted by major brands (ITC, Britannia, Patanjali).

Agri Community App

Crop advisory and market insights. Free tools for retailers (SMS marketing, shop promotion). Real-time mandi prices and community engagement.

Truck Tracking on SoudaBook

Real-time logistics updates without GPS. Weekly mandi price forecasting. Enhanced supply chain transparency.

Revenue Model: Diverse Income Streams and Monetization Strategies

Commission Fees

Percentage of transactions between sellers and buyers.

Value-Added Services

Logistics, storage, and supply chain optimization.

Partnership Revenues

Collaborations with input suppliers and financial institutions.

Competitor Landscape: Understanding the Market Dynamics

Company	Founded	Core Offering	Target Audience	Key Differentiators
FarMart	2015	Ingredients sourcing, Agri Community App, Truck tracking	Farmers, traders, millers	Focus on community-driven tools, truck tracking, and carbon-efficient supply chains
WayCool	2015	Supply chain solutions for fresh produce and dairy	Retailers, businesses	Wide portfolio including dairy; strong logistics network
Ninjacart	2015	B2B platform for fruits and vegetables	Retailers, kiranas	Large-scale logistics operations; extensive cold storage network
DeHaat	2012	AI-enabled crop advisory, financing, and soil testing	Farmers	Strong AI integration and end-to-end farm services
BigHaat	2015	Online marketplace for agricultural inputs	Farmers	Direct-to-farmer platform for seeds, fertilizers, and crop protection products
Arya	2013	Grain storage, trade facilitation	Farmers, Buyers	Focus on grain storage, trade transparency, and financial services
AgroStar	2008	E-commerce for seeds, fertilizers, and agri inputs	Farmers	Online marketplace for inputs with agronomy advice
Captain Fresh	2019	B2B seafood marketplace	Seafood retailers, hotels	Niche focus on seafood, with quality assurance and sourcing

FarMart's Edge

Sustainability Focus

- ✓ 33% reduction in logistics emissions.
- ✓ Prevented 28,350 metric tons of food waste.

Community Impact:

- ✓ ₹1,085 crore transferred to farmers at fair prices.
- ✓ 230,000+ Village-Level Entrepreneurs (VLEs) onboarded.

Technological Innovation:

- ✓ AI-powered quality verification.
- ✓ First agri-tech platform on ONDC.

Comprehensive Supply Chain:

- ✓ Active in 240+ districts across India.
- ✓ Real-time logistics tracking and optimized operations.

Potential Solutions: Enhancing the Farmart's Experience

Advanced Analytics & AI Integration

AI-powered crop advisory for hyper-personalized recommendations. Predictive analytics for commodity pricing and market demand.

Financial Services

Microloans and credit for farmers and traders. Crop insurance and logistics risk coverage.

Localized Learning Hub

Create a platform for webinars, video tutorials, and community training. Include gamification to incentivize learning and app engagement.

Primary Focus - Advanced Analytics & AI Integration – Aligns *strongly* with FarMart's mission to empower farmers and differentiate itself technologically.

Competitive Parity: Features Competitors Are Offering

Integrated Farmer Financing

AI-enabled financial products, including working capital and instant payment systems.

End-to-End Farm Services

Soil testing, pest control advisory, and yield predictions to match AgroStar's offerings.

Marketplace for Inputs

Introduce e-commerce for seeds, fertilizers, and pesticides. Offer bulk discounts for cooperatives and farmer groups.

Primary Focus: Marketplace for Inputs – *Generates revenue while strengthening the ecosystem.*

We are rebuilding
the food supply chain by:

Integrating the food ecosystem

Providing access to
markets and information

Building intelligence and tech for
every step

Big Bets: Moonshot Solutions

IoT and Smart Farming

Enable IoT compatibility for real-time monitoring of soil moisture, weather, and crop health. Provide drones for mapping and crop spraying.

Blockchain-Enabled Supply Chains

Use blockchain for traceability, ensuring transparency from farm to fork. Enable buyers to verify product origin and quality certifications in real-time.

Primary Focus: Carbon Credits Marketplace – *Unique, high-impact, and aligns with sustainability goals, offering FarMart a first-mover advantage.*

Carbon Credits Marketplace

Develop a platform to allow farmers to earn carbon credits by adopting sustainable practices. Partner with global organizations for carbon trading.

Agricultural Waste-to-Energy Solutions

Invest in technology to convert farm waste into biofertilizers or bioenergy. Promote circular economy practices in rural areas.

CO₂ emissions avoided:
41,974
Metric Tons

Food waste reduced:
28,350 Metric
Tons

Every ton of food sold through FarMart emits
33% fewer
emissions
than the conventional food supply chain.

Scaling Strategy

1

Inorganic Growth

Acquire startups in logistics, input marketplaces, and tech integration. Partner with farmer cooperatives to onboard members.

2

Technology First

Expand ERP capabilities for processors and exporters. Integrate AI and IoT for predictive insights and real-time monitoring.

3

Sustainability Focus

Implement carbon tracking and blockchain-based traceability. Highlight sustainability in export-focused branding.

4

Brand Engagement

Launch referral programs and marketing campaigns. Organize training events to strengthen community trust.

Success Stories

Learn from farmers who have successfully implemented carbon credit programs

John Smith

John's Green Farm

"Implementing sustainable practices not only helped the environment but also increased my farm's profitability through carbon credits."

250 carbon credits earned

Sarah Johnson

Sarah's Organic Harvest

"The transition to organic farming and earning carbon credits has been a game-changer for our family farm's sustainability."

180 carbon credits earned

Frequently Asked Questions

Find answers to common questions about carbon credits

What are carbon credits?

Carbon credits are tradable certificates that represent the reduction of greenhouse gas emissions. One carbon credit equals one metric ton of carbon dioxide or equivalent greenhouse gases reduced.

How can I earn carbon credits?

You can earn carbon credits by implementing sustainable farming practices such as no-till farming, cover cropping, and reducing fertilizer use. These practices help reduce greenhouse gas emissions and sequester carbon in the soil.
