Blinkit

MISSION & VISION

Mission: "Instant Commerce"

Blinkit's mission is to revolutionize the grocery delivery experience, making it "indistinguishable from magic" for customers by providing lightning-fast, on-demand access to daily essentials.

Ambitious Growth

Blinkit aims to be 100x larger within the next five years, rapidly expanding its reach and solidifying its position as the go-to platform for instant gratification in the e-commerce space.

Customer-Centric Focus

By streamlining the delivery of daily needs, Blinkit empowers customers to focus on the more important aspects of their lives, freeing up time and mental bandwidth.

Blinkit's Winning Grocery Delivery Model

Hyperlocal Approach to Grocery Delivery

Hyper-local Marketplace

Blinkit partners with nearby stores within a 2km radius, creating a dense network of fulfillment points to service local communities.

Dark Store Fulfillment

Blinkit operates its own strategically located dark stores, which serve as dedicated fulfillment centers stocked with popular grocery items, enabling faster delivery and tighter inventory control.

Streamlined Logistics

By leveraging its network of partner stores and dark stores, Blinkit can provide lightning-fast 10-minute delivery from the time of order placement.

How Blinkit makes money

Commission- Based Model

Blinkit generates revenue by charging a percentage commission on each transaction

Surge Pricing

Blinkit implements a surge pricing model during peak demand hours, allowing the company to optimize revenue and manage resources effectively.

Promotions & Advertisement Fee

Blinkit charges a commission from the companies for promoting their products

Delivery and handling charges

User Persona

Mr.Chetan Saini

26 years

 Gurgaon

About: Works in an American based trading firm

Need: Essential grocery items delivered at doorstep, particularly during late night, requires quality fruits and veggies

Pain Points:

- Odd working hours make it difficult to shop as all stores are closed.
- Requires munchies and other groceries upon returning home around midnight.
- Limited time for shopping due to work commitments.

Ms. Shreya Sharma

28 years

 Delhi

About: Works in an MNC, new to the city, doesn't have a vehicle.

Need: Groceries delivered at doorstep due to lack of nearby stores and transportation.

Pain Points:

- No nearby stores within a 4-5km radius, making grocery shopping inconvenient.
- Lives on the third floor, making difficult in carrying groceries
- Lack of familiarity with the city's layout adds to the challenge of finding stores.

Mr. & Mrs. Singh

55 years

 Chandigarh

About: About: Mr. and Mrs.Singh works in a government department, adapting to technology.

Need: Groceries delivered at doorstep with best prices and Cash on Delivery (CoD) option.

Pain Points:

- Son lives outside the city, making it difficult to rely on him for grocery shopping assistance.
- Preference for CoD due to lack of trust in online payment platforms.
- Desire for convenience and competitive pricing in grocery shopping.

Key Features: Enhancing Your Blinkit Shopping Experience

Home Screen

Profile Screen

Categories Screen

Easy-to-navigate user interface designed for seamless navigation.

User-friendly experience with simplified features and functions for hassle-free shopping.

Personalized festival and seasonal recommendations for curated selections and special deals.

Extensive catalog with organized layout for easy browsing and selection.

Best-in-class search functionality with accurate results for both English and vernacular queries.

Quick reorder from past orders with one-click functionality for seamless shopping.

Clean user profile page for managing settings, viewing order history, and tracking deliveries. In App customer support

New feature: Integrated cooking recipes with automatic ingredient suggestions.

Intuitive Checkout

The estimated delivery time provides users with an indication of how quickly their order will be delivered. This addition is significant, considering that nearly 85% of orders are delivered in or under 10 minutes.

These recommendations are generated from a combination of best-selling items, promotional offers, and the user's previous order history or search activity. They serve as strong prompts to encourage users to explore and shop for additional items.

The one-click share button offers convenient sharing of selected items with friends and family, potentially may result in the addition of more items to the order.

The availability of multiple payment options ensures hassle-free payment for users. Additionally, Cash on Delivery (CoD) serves as a convenient option for individuals who prefer not to use online payments, adding flexibility to the payment process.

Indicating to users the option to add more items for free delivery is a smart strategy, particularly in India where many users are hesitant to pay delivery fees.

Discounts are a powerful tool for attracting consumers and often lead to word-of-mouth sharing. This strategy is effective for acquiring new customers and helps maintain a low Customer Acquisition Cost (CAC).

Users add items to cart

Cart Engagement Rate: No. of users adding products to cart

Proceed to payment

Conversion Rate: No. of users adding products to cart and making a payment
AOV

Payment done

Daily Transaction Volume: No of transactions per day

Challenges

Operational Challenges

Blinkit's expansion faced setbacks, resulting in shutdowns few stores in some cities due to logistical and financial challenges.

Fierce Competition

As the quick commerce market expands, Blinkit competes with rivals such as Swiggy Instamart, Zepto etc, necessitating unique differentiation.

Sustainability Concerns

Blinkit's fast delivery and packaging raise environmental concerns, prompting a shift to sustainable practices.

Delivery Delays

Quality and service issues affecting customer experience

Expected Growth & Insights

1

Current Order Volume & Expansion

Blinkit has experienced exponential growth, with order volumes rapidly increasing as they rapidly expand their network of dark stores across major Indian cities.

2

Revenue Growth

Blinkit has seen substantial revenue growth compared to previous fiscal years, driven by their focus on rapid delivery and attractive promotional offers.

3

Need to Expand Beyond Major Cities

For sustained long-term growth, Blinkit must expand beyond just the major metropolitan areas and penetrate smaller cities and towns across India.

4

Key Performance Indicators (KPIs)

Critical KPIs include customer acquisition, order frequency, average order value, delivery time, and profitability per order - all of which must be closely monitored.

THANKYOU
